AVAILABILITY OF REPRINTS AND PUBLICATIONS

Wildlife Review does not distribute any of the papers abstracted herein, nor can the editor of Wildlife Review undertake to obtain copies of these papers for anyone. A reprint of an article published in a journal may be available from the author, from the organization with which the author is affiliated, or from the publisher of the journal in which the article appeared. When an author's address is known, it is shown in square brackets following the citation. Addresses of most wildlife organizations can be obtained from the Conservation Directory, an annual publication available from the National Wildlife Federation, 1412 16th Street, N.W., Washington, D.C. 20036, at a price of $6.00 per copy. This directory lists more than 900 agencies and organizations concerned with natural resources use.

Use of funds for printing this publication approved by the Director of the Office of Management and Budget, March 3, 1976.

Camera copy for this issue of Wildlife Review has been generated by computer programs developed by the Editorial Office, U.S. Fish and Wildlife Service, Fort Collins, CO.

[Mus. Nat. Hist., Univ. Ga., Athens 30602] Abstract: Previous accounts listed 79 species of mammals occurring in Georgia. Taxonomic changes and improved distributional records now allow listing of 90 species--74 non-marine--with 20 of them represented by more than one subspecies. Consequently, Georgia has 118 taxonomically distinct mammalian species and subspecies.

[Univ. Kiel, Olshausenstraße 40-60, D-2300 Kiel, West Germany] Abstract: A complete bibliography of the genus *Apodemus* for the period 1970-1980 is presented, with a selection of the more important papers from earlier years, and a few references for 1981. A coded index to species and subjects is provided. All titles have been translated into English.

Presents considerable data utilizing numerous maps and tables to describe avian movements primarily within Africa and thus complements earlier works of R. E. Moreau such as "The Palearctic African Bird Migration Systems". Although first outlined in 1961, the book was not actually written until after 1975. Largely the result of an intensive review of the literature (a bibliography of 44 pages), but does include considerable original observations, compared to Europe and North America. Results from wide-scale banding and long-term compilations from well-manned observation points are limited. Several North American species, mainly waterbirds but even a few passerine do regularly visit Africa.--R. A. Ryder.
